[Description](#)

A few people at the public meetings asked me about uranium. I told them that I was not aware of whether or not the deposit contained uranium and had not heard that mentioned before. Uranium can occur in igneous deposits. We would need to ask PLP about whether or not uranium is a trace element in the Pebble deposit. I am out until June 27 so perhaps Phil can give them a call.

I will send the conference info.

Uranium has never been mentioned on the context of Pebble. There are a few metals that are of lower concentration but economic to market, uranium has never been included in the list.

Phil:

Please invite Barbara Butler to this party.

Also, please send out teleconference information when you have it.

A question: Do you know if uranium is associated with the Pebble mining deposit? Would it be of high enough concentration to be of commercial value?

Jeff

Further discussion with Bob Seal to identify information needs of the ERA

Thu 06/23/2011 2:30 PM - 4:00 PM

Attendance is for Jeff Frithsen

Chair:

Phil North/R10/USEPA/US

No Location Information

Required:

Glenn Suter/CI/USEPA/US@EPA, Jeff Frithsen/DC/USEPA/US, rseal@usgs.gov

Optional:

Patricia McGrath/R10/USEPA/US@EPA, Sheila Eckman/R10/USEPA/US@EPA

Time zones:

This entry was created in a different time zone. The time in that time zone is: Thu 06/23/2011 10:30 AM YDT12:00 PM YDT
